DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3 are drawn to the injection system classified in class 604 subclass 131.
 - II. Claims 4-33 are drawn to the battery charger classified in class 320 subclass 127.

2. Inventions the injection system and the battery charger are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it can be used in a device that doesn't require a power cord. The subcombination has separate utility such as the battery charger can be used with a laptop computer.
